FUNDAMENTALS OF BUILDING GREEN

In **GPRO Fundamentals of Building Green**, you will learn how to see buildings differently and discover foundational strategies to make them efficient, healthy and resilient.

GPRO Fundamentals is designed for a range of real estate, construction, architecture and engineering professionals.

This course is ideal for anyone who needs a better understanding of high-performance building including:

- Sales or administrative staff
- Facilities and operations support staff
- Workforce development providers
- College students interested in entering the building and construction industry

This certificate course runs four to six hours depending on the audience. It can be scheduled to meet the needs of your organization and includes the GPRO exam session.

WHAT STUDENTS LEARN

- The relationship between buildings and climate change

- Basic elements of green, high-performance construction and building operations

- Role of trades on high-performance job sites

- Energy-consuming building systems and a high-level overview of strategies to reduce building energy use

---

CONTINUING EDUCATION CREDITS
GPRO Fundamentals qualifies for 4 AIA and GBCI CE Credits.
See gpro.org/faq for details.

WHAT STUDENTS SAY

"The course provided me with a clearer understanding of how to achieve reasonable 'green goals' within my scope of authority and responsibility as a building superintendent and made me more aware of the inter-dependability of the different building components when changes are introduced to any of them."

— Ivan Celin,
Residential Manager,
Columbia University
